by Jozeph Forakis

FOSCARINI

DESCRIPTION

Suspension lamp with diffused light. Diffuser consisting of four injection-moulded polyethylene parts joined by chromed metal hooks. Aluminium painted metal diffuser support and ceiling rose and transparent electrical cable. Canopy decentralisation kit – multiple canopy available (up to 6 suspension lamps).

MATERIALS

Injection moulded polyethylene and varnished metal

COLORS

White

Havana, sospensione

technical details

FOSCARINI

The young, light-weight appearance recalling the shape of a cigar, which ironically gives it its name, the soft light that it emits and the ease with which it blends in with the most varied contexts, have made it the great success that it is today, so much so that it is also part of the permanent collection on exhibit at the New York MoMA. The diffuser consists of four satin finish polyethylene segments. Small round metal hooks hold two subsequent elements together without them touching, leaving room for three slim empty bands that fill up with light when the lamp is on. In white, Havana is available as a suspension, wall or floor lamp.

The young, light-weight appearance recalling the shape of a cigar, which ironically gives it its name, the soft light that it emits and the ease with which it blends in with the most varied contexts, have made it the great success that it is today, so much so that it is also part of the permanent collection on exhibit at the New York MoMA. The outdoor version of Havana consists of a single polyethylene body with signs that recall its division into four segments, a division which distinguishes the design of the indoor version of Havana. The outdoor Havana is available as a suspension or floor lamp in two different heights.

FOSCARINI

DESCRIPTION

Floor lamp with diffused light. Diffuser consisting of a single rotational moulded polyethylene part with direct coupling for assembly onto the support. Rod, base and diffuser support made of metal subject to cataphoresis treatment to add considerable resistance to corrosion and then polyester powder coated. Two different height versions are available – high and low – and three for floor fastening: repositionable base, picket or cylinder for burial. Electrical cable covered in neoprene for outdoor use without switch on the cable. LED retrofit. Suitable for wet locations.
