FOSCARINI

## DESCRIPTION

Wall lamp with indirect and reflected light. The lamp body is made of cement, consisting of a special amalgam coloured with pigments, produced by pouring the fluid mixture into a mould. Internal parabola-shaped brushed steel diffuser, mount and wall mount in painted metal. The light is also diffused downwards, through an opening at the base of the diffuser that is protected by a glass disc with an acidetched finish.

## MATERIALS

Concrete, aluminium and polycarbonate

## COLORS

Brown, Grey, White

# Aplomb, parete

technical details

FOSCARINI

Aplomb wall lamp is an exploration of the expressive possibilities of rough concrete made fluid in its mould and thrilling to see and touch thanks to its special amalgam. Like the original suspension model, the Aplomb wall lamp seems to come from another dimension: from the world of architecture and building - echoed in its raw material - to the domestic environment. The oblique movement of the diffuser merges into and dialogues with its supporting structure and allows for wider ranging light diffusion. The concrete blocks the light completely and then releases it from both the large opening at the top and the smaller one at the bottom. The beam of light directed upwards is reflected onto the walls and ceiling, lighting up the room without ever dazzling. The more delicate beam of light directed downwards, by contrast, creates a sophisticated interplay of light on the walls. Aplomb wall lamp is available in grey, a colour which highlights the materials used to make it, an elegant white and a warm brown colour. It is ideal in all rooms which speak a direct, minimalist architectural language especially if they make use of visible rough-hewn materials individually or in perspective sequences along walls or corridors.

## DESCRIPTION

Suspension lamp with direct light. Cement diffuser, consisting off a special amalgam colored with pigments, produced by pouring the fluid mixture into a mould. Internal parabola shaped aluminium diffuser for the halogen version. Ceiling rose with galvanized metal bracket and batch-dyed ABS cover. Black electrical cable and canopy for the brick red, olive green, sand yellow, concrete grey and brown version, white cable and canopy for the white version. Canopy decentralisation kit - multiple canopy available (up to 9 suspension lamps).

technical details

FOSCARINI

Aplomb is a small suspension lamp that creates direct and precise lighting on an underlying surface. Visible concrete is part of the expressive language of modern architecture and Foscarini, with Aplomb, uses this material with a spirit and a technology that is entirely original. The lamp displays a light touch of extreme elegance and formal simplicity, which softens the massive solidity of the concrete by enhancing its polished and yet unrefined material aspect. The small size of the lamp allows it to be used on its own (for example on a coffee table), in a line to light up a surface or even as a composition at different heights. The GU10 version is available in six different colours. The choice of colours, with pigments added directly into the concrete mix, enhances the personality of the lamp in different ways: the natural grey bring out its materiality, the brown gives a touch of warmth, while the white highlights its elegance. Brick red, sand yellow and olive green are the colours that join the tones already in the catalogue.

technical details

FOSCARINI

Aplomb Large is a new lamp made of concrete, but with a different shape and use from the original version. Apart from being larger in size, Aplomb Large is fitted with a built-in LED light source, placed into the body of the lamp, which casts a wide beam of light onto the surface underneath, unlike the original Aplomb version which instead stands out for its accent lighting. Aplomb is made by Italian experts through a craft-based process of concrete processing. The challenge at the heart of this project was to obtain slim thicknesses, light-weight shapes and a textured surface, still pleasant to touch. It was all achieved thanks to the painstaking care and profound knowledge of the raw material, which allowed the creation of a special mix, particularly fluid when poured into the cast. It is available in three colours - white, grey and brown - made with pigments added directly to the material blend, in order to answer different setting requirements. Aplomb Large can be placed over a table, a kitchen island or a counter, at home or in a public place, and it is perfect for use on its own or repeated in linear compositions.

technical details

FOSCARINI

Born from the desire to use rough concrete, typical of large modern buildings, to create a light object in slender, refined forms, the Aplomb lamp has been hugely successful ever since its inception. A special concrete formula which can be poured into slender moulds has produced an elegant and inimitable product, not simply in its characteristic upturned funnel shape but also in its surface material which is both rough and delicate to the touch. By using the same material, Foscarini proposes an even smaller version of the original suspension Aplomb lamp, which can be used alone or together with the matching larger model at home or in contract settings, over tables, work tops or islands. Aplomb mini is also made in three colours for endless combinations and contexts: grey, white and brown.
