technical details

FOSCARINI

Chouchin is a family of suspended lamps that takes its name from traditional Japanese paper and bamboo lanterns used as light and bright signs outside restaurants and bars, or as lucky charms outside homes. Their typical shape have been reinterpreted in a pure contemporary style, using an age-old material: blown glass that has been painted to make it completely opaque and glossy. The result combines a warm colouring, textured and precious, with a luminous collar that projects an intense, direct beam of light downwards. The family includes three shapes, each with its colour: orange for the large version, grey for the small version and green for the elongated one. The shape and shade accentuate the individuality of each model, coloured in tones that combine beautifully with each other when used in multiple compositions.

technical details

FOSCARINI

Chouchin is a Japanese word meaning those traditional symbolic paper and bamboo lanterns typically used as light and bright signs outside restaurants and bars, or as lucky charms outside homes. Simple and stylish, Chouchin teams unique craft-based expertise with a modern and strikingly simple style. The Chouchin family comprises 3 models with a coloured matt glass body. Beside the first version a new one is born: Chouchin reverse. The shapes are the same but the colours have been inverted; the diffuser is now white while the collar stays the same colour as the previous shape. It is not just about a new colour, but rather a new light, a new use even. Indeed, Chouchin reverse, thanks to the pale blown glass diffuser, not only directs light downwards – like the original Chouchin – but it also diffuses a brilliant, flowing and emotional light into its surroundings.
