PENSILE CON APERTURA A RIBALTA

Le ante aprendosi verso l'alto consentono di avere un' ampia visione d'insieme all'interno del mobile. In questo modo è possibile un comodo accesso agli oggetti contenuti al suo interno e, dal punto di vista ergonomico, molto vantaggioso. La regolazione della forza di apertura può essere impostata in modo esatto in base al peso del frontale. Grazie all'arresto progressivo le ante si fermano in qualsiasi posizione; in questo modo la maniglia è sempre facilmente raggiungibile. La chiusura è ammortizzata di serie.

WALL UNIT WITH FLAP DOOR

The doors that open upwards guarantee ample overall visibility inside the cabinet. In this way, all objects housed inside the cabinet can be comfortably accessed, making the system highly advantageous from an ergonomic perspective. The opening force can be adjusted precisely according to the weight of the front. The doors stop in any position thanks to the gradual stopping movement; in this way, the handle is always easily accessible. The closing movement is cushioned standard

Grazie al meccanismo TIP-ON, le ante a ribalta senza maniglia possono essere aperte semplicemente con un leggero tocco. Per chiudere l'anta a ribalta, è sufficiente esercitare una leggera pressione, che grazie ad una piastrina di bloccaggio, applicata sul lato interno del frontale, ne assicura la perfetta chiusura.

Thanks to TIP-ON mechanism, the flap doors without handles can be opened with a simple touch. To close the flap door, just exercise light pressure, thanks to the locking plate, applied on the inner side of the front panel ensures a perfect closure.
