

FADE

Fade is a blow moulded polycarbonate light cannon with a teardrop shape that focusses the lightbulb's output into a satisfyingly round and luminous circle. Its metalized finish is unusual as it graduates from completely reflective to transparent in an even fade along the body of the light.

FADE

Process

Formed using a technically advanced process of vacuum metallisation. The process involves vaporising a small amount of pure metal at a very high temperature and then sucking it on to a surface by applying an electrical charge.

Cleaning Instructions

Clean with a soft dry cloth only. Do not use polishing agents, water or abrasive materials when cleaning. Always switch off the electricity supply before cleaning.
