GLISS WALK-IN — MDT 2013

Gliss Walk-In is a complete system of walk-in wardrobes. The wardrobe isolates itself to become a real selfstanding room. Gliss Walk-In lends itself to linear and angular solutions, suitable for all types of space, thanks to a "tailored" design system, available in many different finishings. All the equipment, which mirrors that of the Gliss Wardrobes, can be arranged freelr in height, both suspended and on the floor, thanks to a system of panted invisible self-blocking rods.

TECHNICAL INFORMATION

WALL PROFILE Extruded anodised aluminium.

MELAMINE FACED SHELF/BASE

Wooden particleboard panel faced with melamine. Metal brackets to fasten the shelf to the wall profile. Adjustable feet for the base.

LACQUERED SHELF/BASE

Wooden particleboard panel faced with melamine, painted in the colours of the "Molteni Range". Metal brackets to fasten the shelf to the wall profile. Adjustable feet for the base.

WOOD SHELF/BASE

Wooden particleboard panel faced with wood veneer in Oak (Quercus) or Eucalyptus (Eucalyptus globulus). Metal brackets to fasten the shelf to the wall profile. Adjustable feet for the base.

BACK PANEL, DRAWER UNIT STRUCTURE, DRAWER AND TRAY FRONTS, DRAWER SIDES AND BOTTOM (MELAMINE FACED) Wooden particleboard panel faced with melamine.

BACK PANEL, DRAWER UNIT STRUCTURE, DRAWER AND TRAY FRONTS (LACQUER) Wooden particleboard panel faced with melamine, painted in the colours of the "Molteni Range".

BACK PANEL (GLASS VERSIONS)

Wooden particleboard panel faced with melamine, with applied mirror or tempered glass (th. 5 mm), transparent or etched, painted in the colours of the "Molteni Range".

GLASS DRAWER FRONT

Wooden particleboard panel faced with melamine or painted in the colours of the "Molteni Range". Tempered glass th. 4 mm.

CLOTHES RAILS

Tube in chrome plated steel. Tube support in chromed plastic.

LATERAL FINISHING PROFILE

Medium density fibre panels faced with melamine paper, painted in the colours of the "Molteni Range".

SHOE RACK ROD OR TROUSER ROD

In anodised extruded aluminium with plastic insert.

DRAWER INTERIOR

MODULARITY

Methods of executing custom cuttings

In height:

- all vertical profiles (wall-mounted, spacers, finishing profiles) can be reduced to the desired size
- the height of the back panels is custom cut

In width:

- custom reduction up to -614 mm (24 $_{1/8^{\prime\prime}})$ is available only on 1 module
- the minimum possible width for a module is 328 mm

In depth:

- custom depth measurements can be done only on bases and nonjointed shelves.
- the minimum measurement that can be done is 350 mm.

- the size of trays and modular drawer units cannot be reduced
- hanging structures can be fastened only to standard compartments with W 942 (37 $^{\rm 1/8"})$
- if a wider shelf is placed on top of any drawer unit (either freestanding, suspended or resting on the base), the drawer unit must be of standard width 942 (37 1/8").
- two drawer units are available for compartments cut to measure (suspended, standing on base or floor standing).

C-shaped corner composition with or without back panels

C-shaped corner composition without back panels on corners

NOTES

- hanging structures with H 110 can contain any tray
- hanging structures with H 206 can contain trays and also a pull-out tray or a H 190 drawer
- drawers, pull-out trays and trinket trays can be freely installed on all other structures, according to the height of the module
- the interiors of the drawers have always a grey saffiano melamine finish
- in case there is no shelf placed over the drawer unit, a 10 mm thick finishing top is always needed
- no shelves can be positioned in the modules adjacent to a drawer unit.

Drawer units for width custom compartments

To enhance the functional features and adaptability of Gliss Walk-In to all situations, two drawer units H 417/439 with reduced width are available (W 614 for modules cut to measure up to W 642, and W 450 for modules cut to measure up to W 478). These drawer units can be used suspended above the shelf, either supported by the base or floor standing.

example of drawer unit suspended on the left

Handle in pewter colour finish

Notes

Prices of drawers, trays and pull-out trays include the cost of the pewter colour finish handle. For the handle covered in Eco Skin, add a supplementary charge.

Reductions

- the size of trays and drawer units cannot be reduced
- hanging structures can be fastened only to standard compartments with W 942
- if a shelf is placed on top of a drawer unit (either freestanding or resting on the base) the drawer unit must occupy a standard W 942 module.

Notes

Besides the instructions concerning the drawer units 942 W, we add following:

- Drawer units always have two wooden drawers H 190
- The suspended drawer unit can be positioned either on the left or right part of the reduced module.

Led lighting

Shelves can be accessorised with LED lighting. Lighting systems are conformant with European safety standards.

Notes

At the moment of the order, the customer must always indicate on the drawing the shelf or the shelves where the lighting bars should be installed. The bars will always follow the width of the shelf. If the shelf is jointed, two bars will be made, one for each part of the shelf.
