MOKA

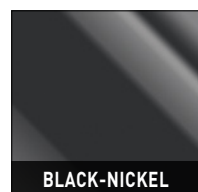

Il dettaglio identificativo del programma Hamilton è la cornice in metallo; con essa prevale la dimensione estetica, la leggerezza e un principio della ricerca legato alla contemporaneità. Per chi volesse rinunciare, invece, alla base in metallo, mantenendo comunque le alte performance delle sedute di Hamilton, l'alternativa è la scelta del piedino in legno di frassino a poro aperto tinto Moka, una soluzione più discreta, sobria e silenziosa.

The frame is the distinguishing detail of the Hamilton system, as closely related to the aesthetic dimension, lightness and a contemporary research principle. Those who prefer to give up the metal base, while aiming for high-performance seats, have an alternative available: they can choose the Moka, open-pore Ash foot, which means a more discreet, simpler solution.

Erkennungszeichen des Hamilton Programms ist der Rahmen aus Metall. Er katapultiert Faktoren, wie die optische Dimension, Leichtigkeit und ein aktuelles Forschungsprinzip in den Vordergrund. Wer dagegen lieber auf das Metallgestell verzichten möchte und trotzdem grossen Wert auf die Leistung der Hamilton Sitzflächen legt, kann Alternativ die offenporigen Escheholzfüsse in der Farbe Mokka wählen und setzt damit auf eine diskretere, einfachere und leisere Lösung.

Le signe distinctif du programme Hamilton est son cadre en métal ; celui-ci souligne la dimension esthétique, la légèreté et le principe de la recherche lié à la modernité. Ceux qui souhaiteraient par contre renoncer à la base en métal, tout en conservant les hautes performances des assises Hamilton, peuvent opter pour le pied en bois de frêne à pore ouvert teinté Moka, qui procure une solution plus discrète, sobre et silencieuse.
